

SSAS Management

Alert Advanced Hardware Integration

Pole Star is able to integrate SSAS (Ship Security Alert System) hardware from other major manufacturers with its Alert Advanced management system to provide you with a SOLAS XI-2/6 compliant SSAS management system.

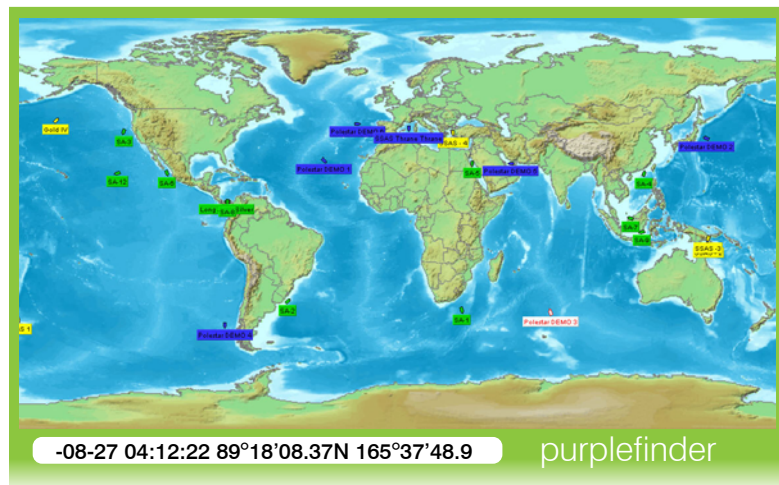

This means that while the onboard hardware might vary, you can now monitor and manage the entire fleet on one flexible and reliable platform.

Integrating the fleet with Alert Advanced enables you to manage your fleet's security:

- On one proven SSAS management system
- From one single screen
- With one administration system

Managing the fleet is simplified, security is improved and administration is reduced.

You gain peace of mind for your fleet security and your annual radio survey.

Hardware compatibility

The following SSAS units can now be integrated with the Alert Advanced service:

- | | |
|----------------------------|-----------------------------|
| ▪ Pole Star DSAS | ▪ Pole Star DSAS-L |
| ▪ Furuno Felcom 15/16 SSAS | ▪ Thrane & Thrane TT3000SSA |
| ▪ JRC JUE SSAS | ▪ Nera Mini-C SSAS |
| ▪ Satamatics Ocean Alert | ▪ Transas Ship Guard |

If you have a SSAS unit not listed here, please contact Pole Star to discuss your integration requirements.

Alert Advanced Service Option

Alert Advanced combines an SSAS management system with sophisticated tracking and data reporting.

By using Pole Star's Alert Advanced Integration service you benefit from the following:

- Unlimited alert cycles for security alerts and routine testing
- Manage alerts and tests and reset unit from your login
- Up to 4 position reports per day
- Full position report history
- View entire fleet on Fleet map and Fleet list
- Set up separate logins for specific vessel groups
- Security alerts sent to email/SMS/fax to keep you informed in or out of the office
- Interactive C-Map™ marine charts with zoom and pan to monitor a security incident
- Poll a vessel to receive immediate position report in a security incident
- Increase position reporting frequency in the event of a security alert
- Access to global meteorological forecasting and storm/cyclone/hurricane data
- Reduced service fee option should vessel be out of service for more than one month

Integrating your fleet with Alert Advanced makes security management easy, with full Pole Star support and flexible payment options.

Pole Star has received Type Approval for its SSAS systems from all major classification societies. See our website for details: www.polestarglobal.com/m/compliance
